ANIL KATTA

FULL STACK DEVELOPER

PROFESSIONAL PROFILE

Dedicated and detail-oriented Full Stack Developer with [1-year] of experience in designing, implementing, and maintaining robust software solutions. Proficient in both front-end and back-end technologies, I bring a holistic approach to web development, ensuring seamless integration and optimal user experiences. My expertise includes a deep understanding of various programming languages, frameworks, and databases, allowing me to deliver end-to-end solutions tailored to meet business objectives.

WORK EXPERIENCE

Indstack (FullStack Developer)

January 2023 - present

As a Full Stack Developer at IndStack, I contribute to both front-end and back-end development tasks, ensuring seamless integration and optimal functionality. My responsibilities include collaborating with cross-functional teams to analyze requirements, design scalable architectures, and implement efficient code.

Ap Genco (SDSTPS)

November 2022- November 2023

- Dedicated Site Engineer with one year of hands-on experience at A PGENCO, specializing in power generation projects.
- Executed and supervised construction activities at the power generation site, ensuring compliance with safety regulations and project specifications.
- Collaborated with cross-functional teams, including architects, contractors, and project managers, to achieve project milestones within the given timeframe.

Roles And Responsibilities

- Overseeing day-to-day activities at the construction site.
- Ensuring that work is carried out in compliance with project specifications and quality standards.
- Managing and coordinating subcontractors, labor, and materials.
- Ensuring that all construction activities adhere to safety regulations and guidelines.
- Implementing and monitoring safety protocols to minimize the risk of accidents.
